

Press-Release

IEEE International Siberian Conference on Control and Communications

SIBCON

November 17–19, 2022

Tomsk, Russia

Dear colleagues,

The 16th Siberian Conference SIBCON–2022 aims to offer opportunities to learn and to share information on the latest advances in communications, electron devices, and control systems. It will be held in Tomsk, Russian Federation, on November 17–19, 2022 based on Tomsk State University of Control Systems and Radio-electronics (TUSUR). The conference is organized by the Institute of Electrical and Electronics Engineers (IEEE) on a regular basis in order to promote interdisciplinary discussion and interaction among scientists and engineers with an emphasis on IEEE membership. While the scientific program is expected to create stimulating professional interaction, the magic of Tomsk, the winter atmosphere, the dark days season, and the wealth of historic wooden architecture promise a pleasant and memorable stay.

The SIBCON International Conference is a forum to bring together business people, researchers, scientists, and industry professionals to discuss innovative ideas and diverse topics on next generation of comms technologies and control. Using this forum, researchers and practitioners can exchange issues, challenges, and new technologies and solutions. The SIBCON aims at attracting both researchers from academic and industrial institutions and practitioners from industry. Researchers, practitioners, and distinguished speakers are invited to submit a paper or to make proposals of original research speeches addressing business and technical issues, challenges, solutions, and technologies in building applications, complete solutions, and services.

Submitted papers are expected to cover state-of-the-art technologies, theoretical concepts, standards, products implementation, ongoing research projects as well as application issues of control and communications.

Previous SIBCON has been joined a lot of participants from several countries including Australia, China, Egypt, Finland, Germany, India, Iran, Italy, Japan, Kazakhstan, Korea, Latvia, Malaysia, Portugal, Romania, Russia, Slovakia, Spain, Sweden, Thailand, Turkey, Ukraine, United Kingdom, United States, etc. Based on the success of previous conferences held in Astana, Omsk, Krasnoyarsk, Tomsk, Moscow, the next SIBCON is expected to be one of the most significant international academic conferences in the field of control and communications.

SIBCON Conference is focused on the following technical tracks:

1. The Fundamental Problems of Communication and Control Theory.
2. Electronic instrumentation, microelectronics, and radiophotonics.
3. Information technology, cyber-security, and cyber-physical systems.
